

Hogwarts Express Bookends

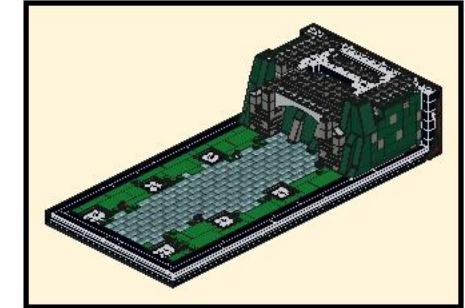

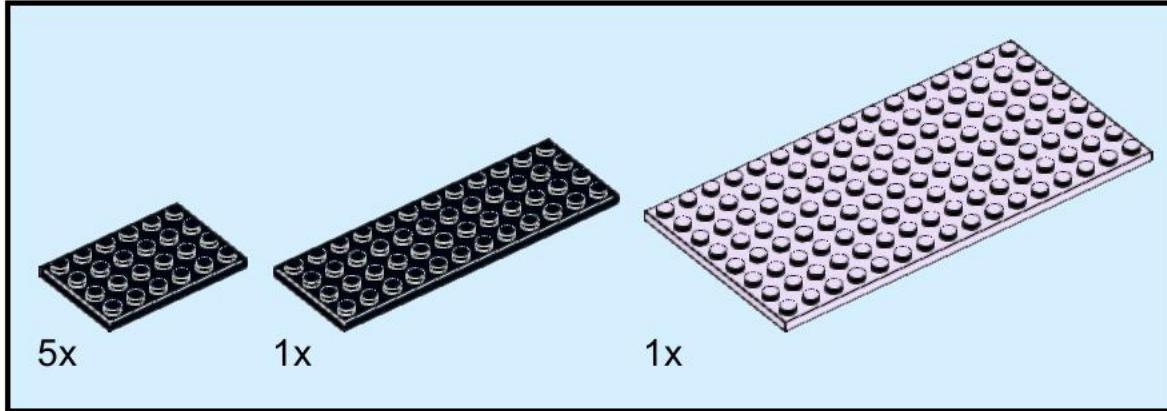

Bookends designed by Ryk Field. Inspired by Aaron Bright's similar bookends on Facebook.
This design uses the train from the official Lego set 75955 Hogwarts Express.

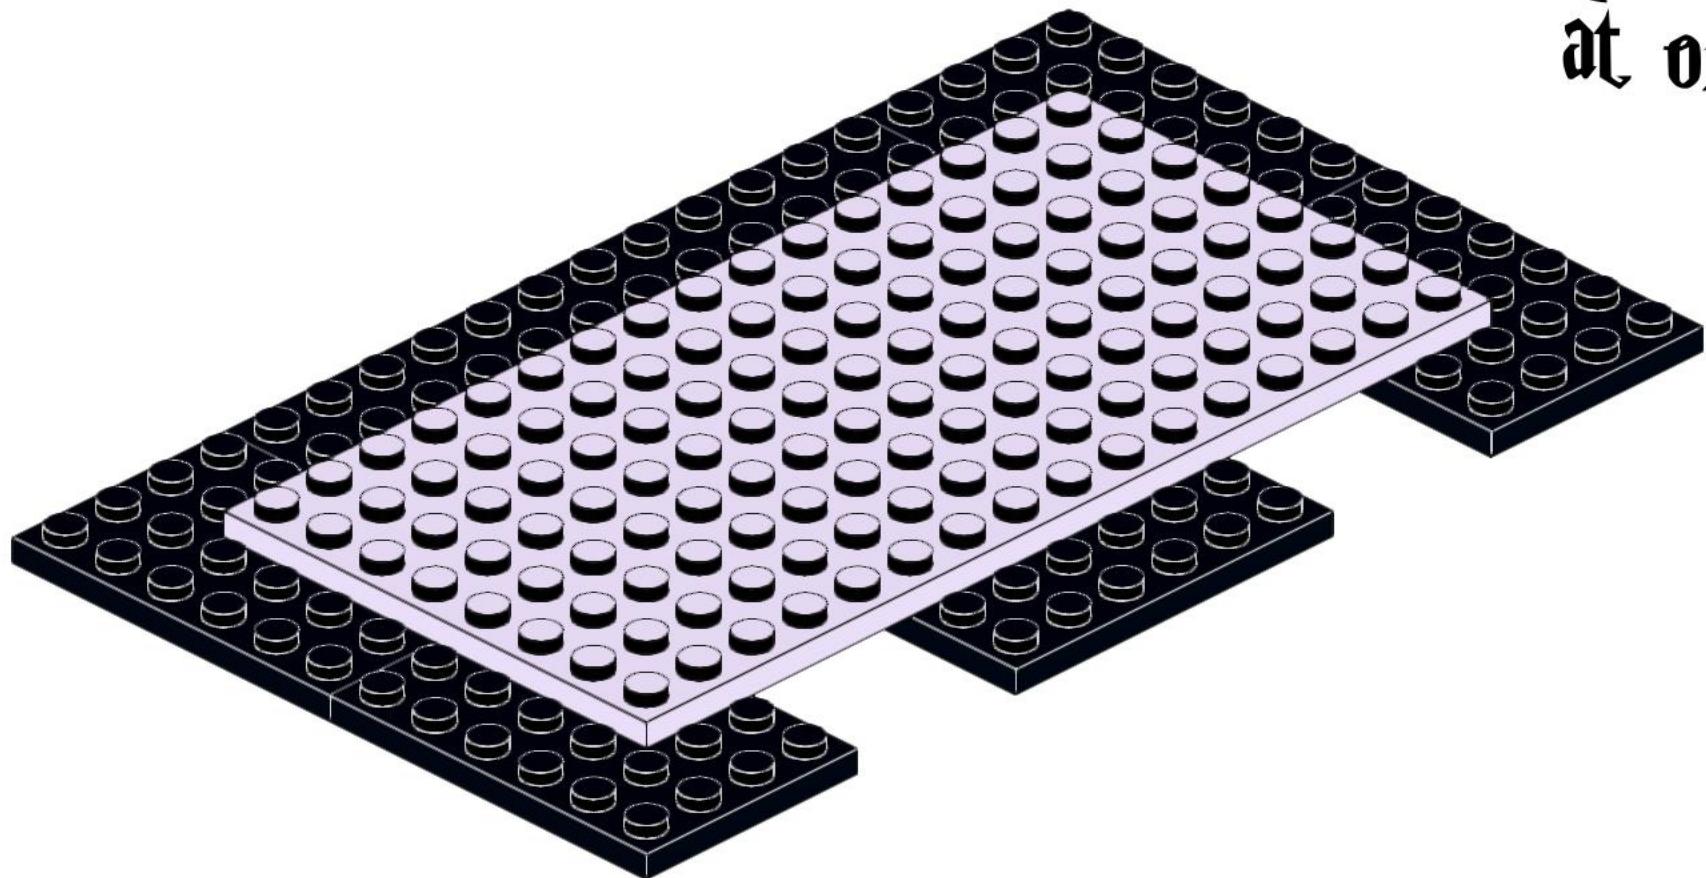

For these bookends, the Tender is built as two separate halves. Each half requires several parts that are not in the official set. The required parts are included in the XML part list. Please be aware that if you use the stickers on the tender, it will need to be sliced in half with a craft knife. This is easily done with the two halves of the tender pinned together, the sticker applied across them both, and then sliced.

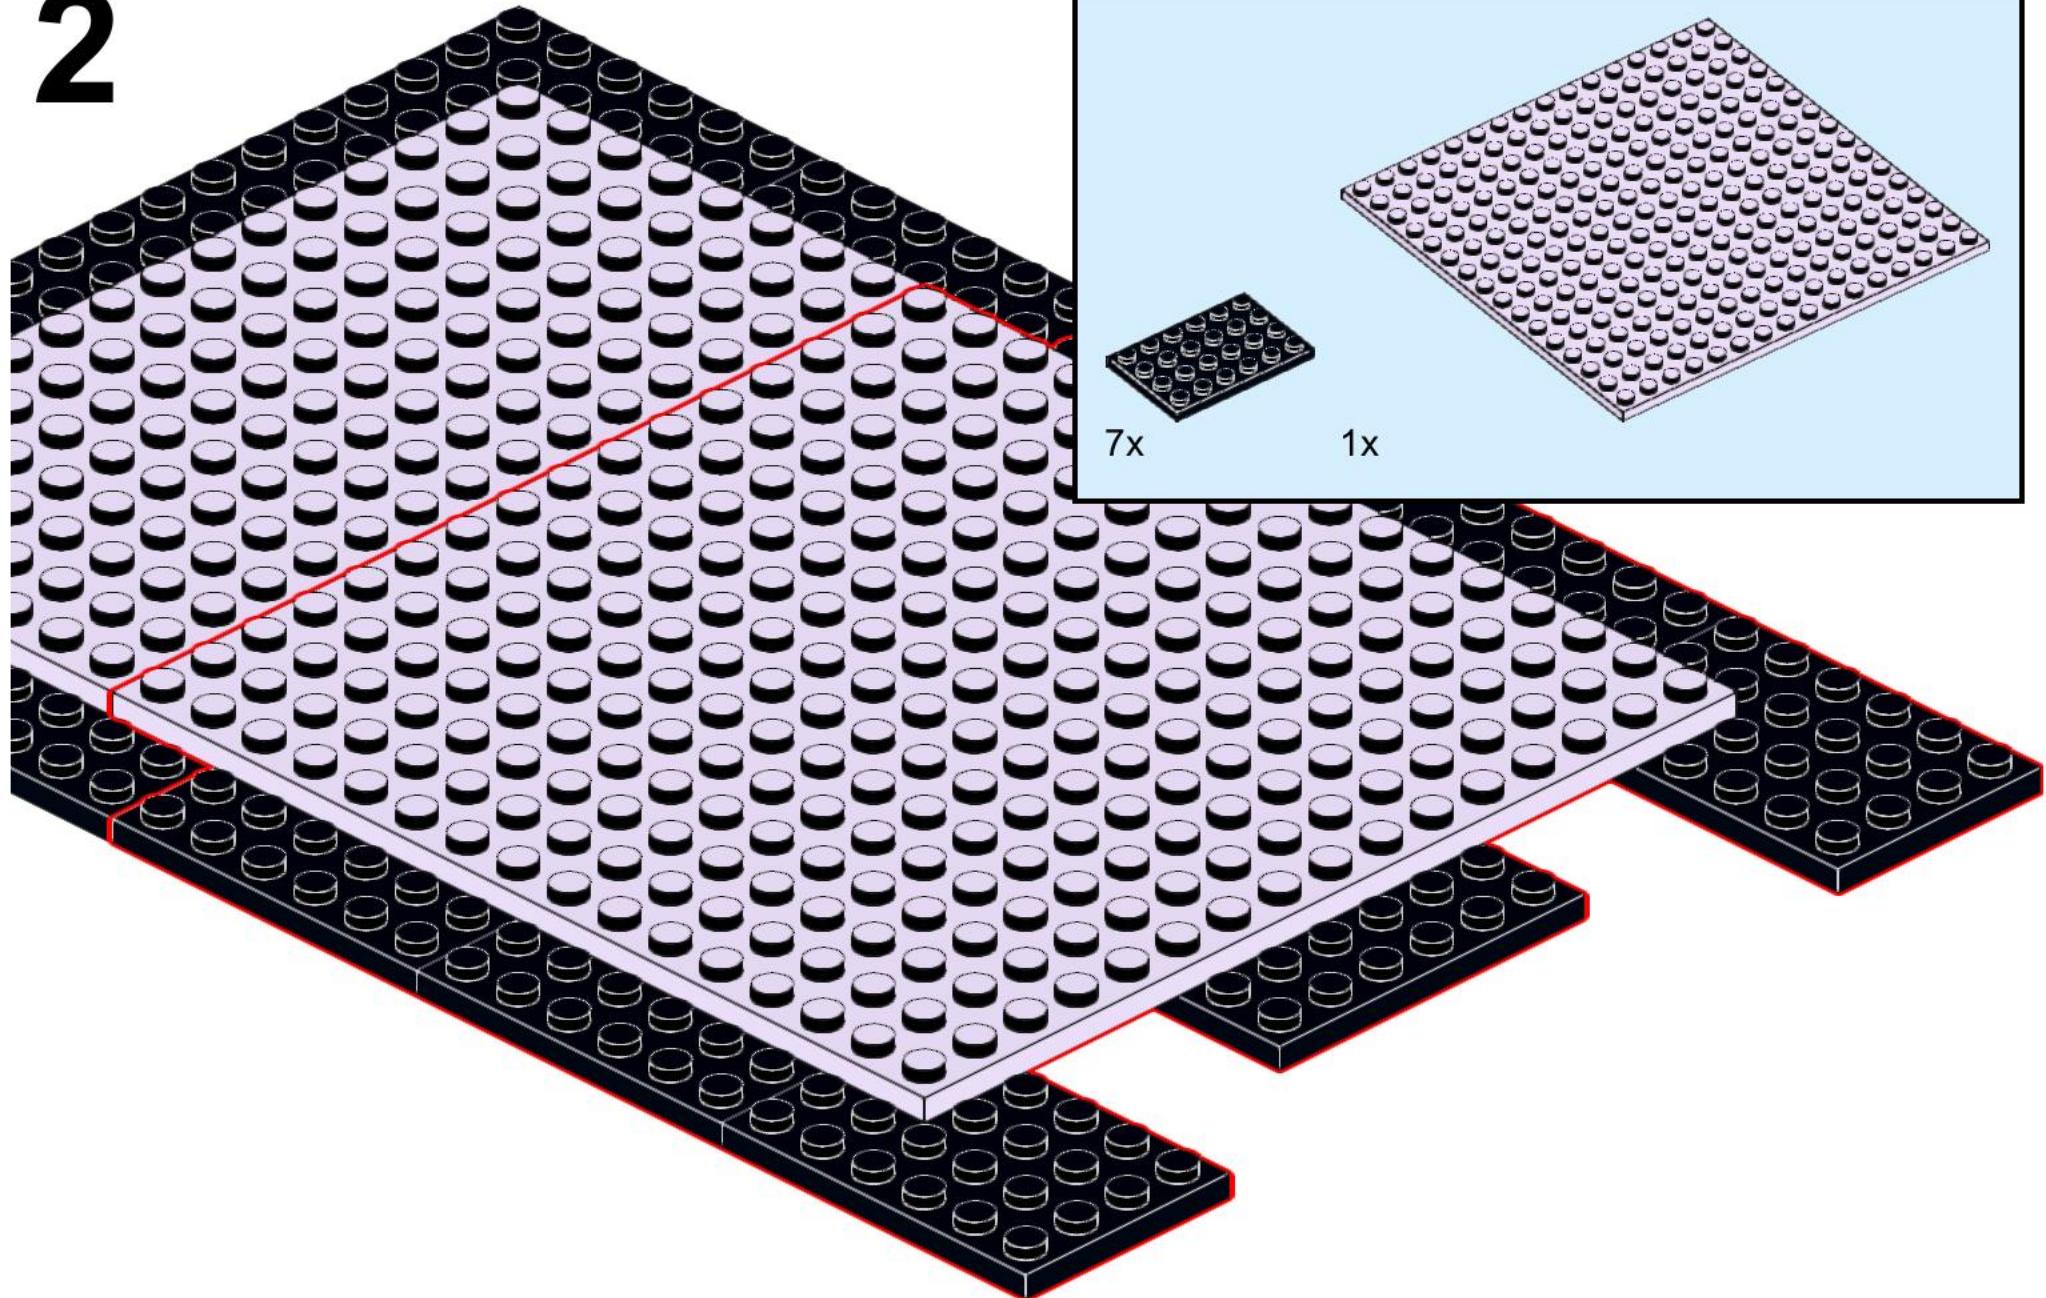

1

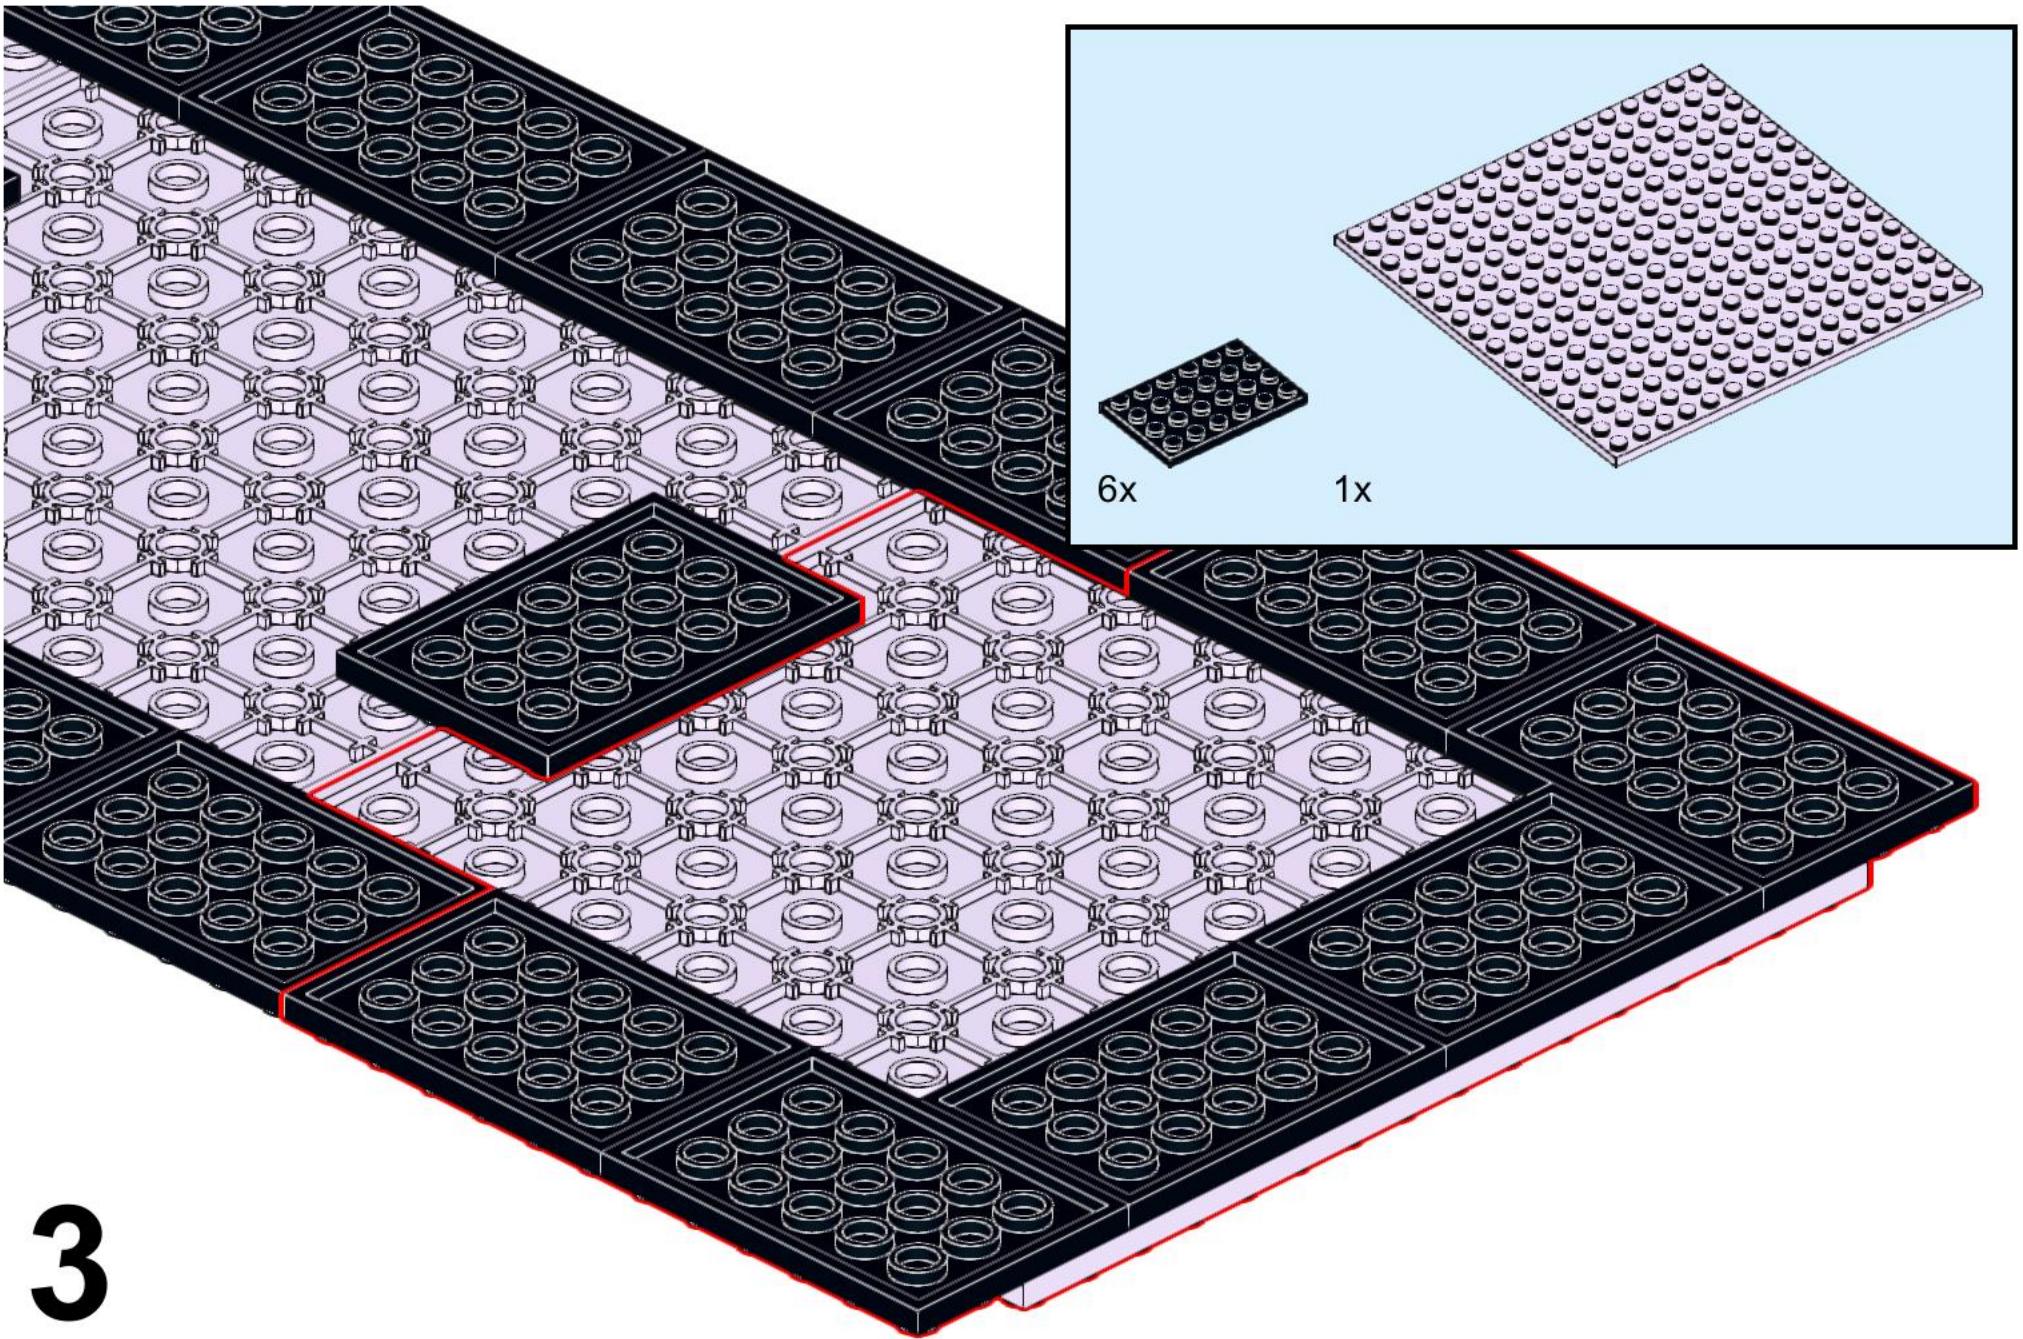

Build two
at once.

The viaduct supports are built with a mix of old and new dark gray parts for a more aged appearance. This isn't necessary. Use what you have!

The Tender will be built in two separate halves, which are then pinned to the inside of the tunnels. The halves can also be pinned to each other when you want to play with the train.
